Upstream

by Elia Group

Understand your supply chain, steer decarbonization, report with ease!

Upstream captures supplier-provided primary data, linked to SAP S/4HANA purchasing data in real time, enabling audit-ready Scope 3 reporting and supporting CSRD-aligned requirements.

elia group

Reliable Primary Data Collection
Capture accurate, supplier-specific data with standardized templates and full life cycle insights — from raw materials to transport. Gain clarity on emission drivers and reduction opportunities.

Real-Time Carbon Controlling
Seamlessly integrate with SAP S/4HANA to sync procurement and sustainability data. Enable proactive Scope 3 management with consistent, real-time insights across systems.

Scalable, Audit-Ready Reporting
Ensure traceability and compliance with built-in audit trails. Export CSRD-compliant reports (ESRS E1-6, E5-4) with confidence — no manual errors, no surprises.

Upstream packs powerful features into one platform

- Calculate your purchase's carbon footprint with *Upstream*'s built-in LCA tool.

- Fill supplier data gaps with accurate, product-specific emissions estimations—no more reliance on generic spend-based factors.

- Generate real-time Scope 3 (Cat. 1 & 2) and Raw Material Inflow reports with traceable, exportable insights for seamless compliance.

Reach out to book a demo and see if *Upstream* is a match for your needs!
