

PRESS RELEASE | Brussels, 10 March 2021

Elia Group to rejoin BEL 20

Elia Group will rejoin the BEL 20 index on 22 March 2021. The company has been listed on Euronext Brussels since 2005 and was previously included in the BEL 20 between March 2012 and March 2017. Its return to the index is evidence of the market's confidence in its growth and strategy.

Elia Group is an active player in electric power transmission, ensuring that generation and consumption are balanced at all times. It operates in Belgium (via Elia) and Germany (via 50Hertz) and supplies 30 million end users with electricity, making it one of the top five transmission system operators in Europe.

Last year, Elia Group invested €337.4 million in its infrastructure in Belgium (and €715.9 million in Germany) in order to guarantee a reliable and sustainable energy system. Over the next five years, the Group's investments in infrastructure will reach €7.9 billion (€3.2 billion of which will be invested in Belgium) in order to ensure an efficient electricity system and to address the ambitions and challenges the Group will face going forward.

Elia Group is a listed holding company whose core shareholder is the municipal holding company, Publi-T which holds a 44.83% stake. This ensures the Group has strong local anchorage, allowing it to play a pivotal role in the interest of society.

The BEL 20 index is made up of those Belgian companies listed on Euronext Brussels which have the largest free-float market capitalisation, whose shares are sufficiently liquid and where at least 15% of staff are employed in Belgium. Its composition is reviewed each year in March.

”

Elia is at the heart of the energy transition. Through our investment and digitalisation programme, we are preparing the electricity system for a sustainable and low-carbon future. Our growth across Europe, which is deeply rooted in Belgium, will benefit from even greater visibility once we join the BEL 20. This is important for a company that works in the interest of society.

Chris Peeters, CEO Elia Group

About the Elia Group

One of Europe's top five players

The Elia Group is active in electricity transmission, ensuring that generation and consumption are balanced at all times. We supply 30 million end users with electricity and manage 19,271 km of HV lines via our subsidiaries in Belgium (Elia) and north-east Germany (50Hertz). As such, our Group is one of Europe's top five system operators. With a reliability level of 99.9%, we give society a robust power grid, which is important for -socio-economic prosperity. We also aspire to be a catalyst for a successful energy transition towards a reliable, sustainable and affordable energy system.

Achieving the energy transition

By expanding international high-voltage connections and integrating ever-increasing amounts of renewable energy, the Elia Group promotes both the integration of the European energy market and the decarbonisation of our society. At the same time, innovation is reshaping the Group's operational systems and we are developing new market products to enable the latest technologies and new market players to access our system. In this way, the Elia Group is making the energy transition happen.

In the interest of society

As a key player in the energy system, the Elia Group is committed to working in the interest of society. We are constantly adapting our transmission grid to the rapidly changing energy mix, incorporating ever more renewable energy. We also ensure that investments are made on time and within budget and guarantee maximum safety. When we carry out our projects, we manage stakeholders proactively by establishing two-way communication with all affected parties very early on in the development process. We also offer our expertise to our sector and relevant authorities to help build the energy system of the future.

International focus

In addition to its activities as a transmission system operator, the Elia Group provides various consulting services to international customers through its subsidiary Elia Grid International (EGI). Elia is also a member of the Nemo Link consortium, which operates the first subsea electricity interconnector between Belgium and Great Britain.

Elia Group is a listed holding company whose core shareholder is Publi-T, a municipal holding company.-
